

# Partner User Management

Partner user management helps to designate which users manage each Supply or Demand Partner relationship.

## Applying User Assignments

User assignments can be applied in two ways:

1. On the Supply/Demand Partner edit page using the 'Assigned To' drop down menu.

2. The account admin can also bulk assign partners to a user in User Management by selecting partners from the Assigned Supply and Assigned Demand drop down menus on the user edit page.

User: lkqprod\_user1

## User Management in Reporting

When included as a reporting dimension, user assignment will display in reporting as the user's first and last names.
